

# EASYLABEL® 6

## The Easiest, Most Powerful System Available For Design And Printing Of Labels And Bar Codes!

### EASYLABEL 6 is NEW & Better Than Ever!

- **EASYLABEL 6** enables you to custom design your own labels on demand, quickly and easily.
- Many users are tired of days or weeks of frustration with label design software only to find they really need another package. The truly distinctive feature of **EASYLABEL 6** is that you'll never need to buy another label design package again. As your needs change, **EASYLABEL** will change and grow with you.
- **EASYLABEL 6** pays you back quickly through lower label inventory, less waste due to label obsolescence and the elimination of expensive pre-printed labels.
- **EASYLABEL 6** is a **FREE** upgrade for all **EASYLABEL 5** users. Our Customers have only had to pay for **ONE** upgrade in the last 30 years!
- You don't have to be computer literate to handle complex labeling requirements. The goal of **EASYLABEL 6** is to make you productive, successful and more effective. It does all the hard work, so you don't have to.

### FREE Technical Support & Interactive Tutorials

**NO annual support contracts or fees!** We offer Free Technical support on EASYLABEL 5 & EASYLABEL 6. You may reach technical support by either phone or email.

**Phone: (330) 273-4408 or E-mail: [techsupport@tharo.com](mailto:techsupport@tharo.com)**

Our Interactive Tutorials walk you through a step by step demo that allows you to see how to set-up and use the different functions found in EASYLABEL 6. These tutorials can be found on our website at:

**[www.tharo.com/interactive.php](http://www.tharo.com/interactive.php)**

### NEW! EASYLABEL 6's Print History Console

- **Central Location** - Multiple copies of EASYLABEL can connect to the Print History Console allowing for a centralized location for logging and reporting.
- **Search and Sort** - The Print History Console provides reports that can now be searched or sorted and viewed or accessed in the provided interface or any other application that can access Microsoft SQL table. Users now have the option to make the Print History Console part of an existing SQL server or to install Microsoft SQL Express when setting up the new feature.
- **Secure** - Control access to the Print History Console and protect sensitive information by specifying who can view the reports. Prevent unauthorized users from reprinting labels or simply restrict all users' access.
- **Complete Label Reporting Solution** - Print jobs can be reviewed in a list containing such data items as the Date/Time the job was sent, status of the last job, computer the job was sent from, label format printed, printer the job was sent to and number of labels printed. Every field value is listed for every label in the batch similar to EASYLABEL's current "Tracking Report By Batch" option. You can use a search to find field values from printed labels from the main page. Also, a label preview image is presented for each printed label batch. You can limit the number of jobs shown to any range of time: 24 hours, 7 days, 30 days or just show all labels ever printed.
- **Track and Backup** - The Print History Console tracks all changes including ones made to a specific label format. The feature will create a backup and log the reason for a change anytime the format is saved. These backups can be used to replace a format if the changes made were accidental or inappropriate. Changes made to the user configurations such as: adding a user, deleting a user or changes to a user and/or their rights can be logged as well. The Print History Console can be set to log users login success, login failures, log-offs and any password changes.
- **EASY Label Reprints** - Easily reprint any damaged label with the Print History Console by simply clicking on the label in the list and selecting reprint. The User can select a specific label in the job or range. Reprinted labels themselves are logged and flagged as reprints in the report.
